**Subject:** Local Codes Impact - Provider Profile

This week we received a Help Desk Ticket which addressed concerns with data on the current Provider Profile. Upon analysis of the ticket it was determined that the Provider Profile process should have been remediated for local codes impacts.

Please find attached Appendix 'D' - Provider File ISD Specifications which is the document used to communicate the provider extract layouts to the health plans.

We have modified the Provider Profile layout described under Exhibit D1 to include the new fields Place of Service and Procedure Modifier. See page D-3.

The physical length of the record did not need to change because we was able to utilize the filler field and reduce it by 4 bytes and then insert the two new fields totaling two bytes each.

Test files will be available soon, and you will be notified when these are placed in the test directory.

Please let us know if you have any questions.
